**DETAILED ACTION**

1. Applicant's arguments in response to the Office action dated 07/20/07 have been fully considered.
2. Claims 1-18 are pending and claims 19-21 are cancelled.
3. The 35 USC Section 103(a) rejections to claims 19-21 based on Kelch et al. (US 5,695,870) are moot because claims 19-21 are cancelled.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As amended the preamble of claim 1 now reads "An unbonded capping testing system for strength testing of concrete masonry units". The recitation "unbonded capping testing system" is ambiguous. It appears from the specification and claim 13 that Applicant's invention is directed to a testing system that is used for strength testing of concrete masonry units. Therefore, the claim preamble as recited above is ambiguous because it is not clear as to what is meant by "unbonded capping testing system". Since claims 2-6 depend from the rejected claim 1, these claims are rejected as well.

***Claim Objections***

5. Claims 7-18 are objected to under 37 CFR 1.75 because claims 7 and 13 are substantial duplicate of each other. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Please note that the Examiner's conclusion that claim 7 is substantially duplicate of claim 13 is not based on the form or the specific words used in claim 7, but rather based on the scope of claim 7 as ascertained from the specification. It is noted that claim 7 recites "In a testing system for compression testing of concrete masonry units including first and second platens". From the specification the testing system for compressing testing of concrete masonry unit of claim 7 necessarily requires pistons to operate platens. Thus, claim 7 when interpreted in view of the specification requires pistons causing it to read on claim 13.

Applicant is respectfully requested to demonstrate substantive differences in scope between claims 7 and 13 on the record, while keeping in mind that any such difference in scope must be supported by the specification.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
